

XMLLine 2.0 Release - Modules

NEWS_PDF_AUTHOR: phppp

NEWS_PDF_DATE: 2006/7/22 13:37:33

XMLLine is a XOOP2.0/2.2/2.3 module for fetching, parsing and displaying XML feeds.

Features:

- 1 Supported feeds: RSSs, ATOM
- 2 Fetching methods: CURL, fsockopen, fopen.
- 3 Multi-category
- 4 User Customable fetching/submit

XMLLine will be under maintenance with no new feature introduced.

Considering that the module of "planet" has both feature and performance advantages over XMLLine, you are recommended to use the [planet](#)
