## **XOOPS Chat.com: Inter-Site Chat For XOOPS**

*This is probably the most basic XOOPS site ever made.*

XOOPS Chat.com provides cross-site Instant Messaging for XOOPS users and their websites.

By adding the following code to a custom block, you'll be able to communicate with other XOOPS users on any site using the code. Feel free to modify the height and width to suit your needs.

**Note:** This system is designed for XOOPS-related support requests. IP addresses are logged and anyone abusing the system will be banned.

Your browser does not support inline frames or is currently configured not to display inline frames.

The site designed with a minimal amount of modules and a stripped-down version of the default theme with a flexible width.

[XOOPS Chat.com](https://xoops.org)

This is a work in progress. **Constructive** comments and suggestions are welcome. All others will probably be ignored.
