In keeping with the spirit of Xoops, here is a theme for a gaming clan that I designed. It's available for free.

It's my first full theme ever designed, not just a modification of an existing theme.

I originally had the same block design for the center blocks as the left blocks but haven't yet learned how to get the graphics to apply to them. It's ok though. The theme works well the way it is now.

Hope you enjoy it.
