The newbb project is re-activated on dev.xoops.org - Modules

NEWS_PDF_AUTHOR: phppp

NEWS_PDF_DATE: 2006/7/30 4:40:25

To enforce the module developement, I now (re)take over the "newbb" module with public name of CBB(newbb).

Meanwhile I would like to **establish the new CBB(newbb) Dev Team**.
For the members currently existing in the project, plz confirm with me that you are still willing to be in the project.
For people who would like to contribute as a regular dev member, plz leave a msg or send me email.

Other modules from xoopsforge.com will transfer back to dev.xoops.org as well for the purpose of better management and timely response to users.

Thank you all.
