

MatrixForge Open Source portal launched - YAXS

NEWS_PDF_AUTHOR: stmatrix

NEWS_PDF_DATE: 2006/8/17 13:41:43

I have launched MatrixForge as an Open Source project portal dedicated to open source projects from my own company (SOFTECHMATRIX). Several existing company projects will be moved to MatrixForge as well as several new projects that will be initiated in the not so distant future.

I'm also working (some finished, some underway) on Dutch translations for a few XOOPS modules (xHelp, xDirectory, AMevents) that I want to release asap. Those will be maintained on MatrixForge as well.

Visit [MatrixForge](#)

If you are interested in what's going on at MatrixForge, please register (free of course) on the website and subscribe to the news section for notifications, as a lot is going to be added during the next weeks/months.

I'm looking forward to meeting you on MatrixForge
