

[WOLFFACTORY] popGen: generate your media codes - Modules

NEWS_PDF_AUTHOR: solo71

NEWS_PDF_DATE: 2006/8/19 12:30:00

The [wolFactory](#) is proud to announce the release of [popGen 2.0](#).

This module help webmasters to generate code to display an image as a popup, but also now, to create a customizable code to display any kind of media (picture, flash, sound, video). The module also generate customisable popup and its content.

Functionalities :

- multiMedia code generation (images, sounds, vidéos, flash) in respect of major browser web standards ;
- Possibility to generate medias by lot (thanks to a numerotation system - see contextual help) ;
- Display mode : slideshow or picture gallery ;
- Preview and display system for each and every media type ;
- Data backup system ;
- Popup generator.
- etc.

With multiMenu 1.8, Popgen is the second module developed with the contribution of [Blueteen](#) and myself.

PopGen is currently visible on [wolFactory](#).

The module is downloadable on [Arma's download section](#).

Enjoy!
