xNLine XOOPS Theme - Themes

NEWS_PDF_AUTHOR: JMorris

NEWS_PDF_DATE: 2006/8/20 15:00:00

TARGET AUDIENCE: Seasoned XOOPS Users
COMPATIBILITY: XOOPS 2.0.x (*Not Tested With 2.0.14)
COMPLIANCE XHTML 1.0/1.1 Transitional and CSS 2.0/3.0 (*Using Default XOOPS System Templates)

DESCRIPTION: The xNLine theme is an excercise is Blog styling that is dynamic an flexible. This design takes the concept of single/two column designs and adds a few custom touches such as a customizable CSS dropdown menu (courtesy of Dynamic Drive), dynamic block title display (titles are no longer required), RSS auto discovery, page load / DB query statistics, and customizable advertiser zones.

The overall design goal for this theme was to produce a reasonably accessible design that is search engine friendly, easy to navigate, highly customizable, and reader friendly. This design is especially well suited to sites that display a large amount of content where a traditional 2/3/4 column layouts would be too cramped.

NOTICE: This theme is targeted to Experienced XOOPS Users! If you are not comfortable editing themes and templates Do Not Download And Install This Theme!.

TERMS: This theme is distributed under the terms and conditions of the GNU GPL (version 2). You are free to use this theme in any fashion you wish, however, **all source code credits must remain intact**, and as a courtesy to me, I respectfully request that you retain the link to MyWebResource in the footer of this theme.

This theme comes with absolutely no warrantee or guarantee of support. By downloading this theme, you agree that you are accepting this theme in an as-is state.

Please see the README.txt file accompanying this theme for complete details of the licensing of this design and any other terms and conditions.
