Due to several requests from users of XOOPS I've decided to share with you guys my WoW site's theme exactly how it is on my site.

Things to do after you download the theme:

- remove the Google ads or put your code in there;
- customize the header so it fits your needs (the best will be a screenshot from the game);
- PLEASE leave the copyrights intact.

DEMO: see it in action on [Ucigasa - rogue on Twisting Nether \(EU\) and Azgalor \(US\) Realms.](#)

DOWNLOAD: [HERE](#).

THUMBNAIL:

Thanks,
Alex
