

PhpAdsNew Banners system Upgraded - Modules

NEWS\_PDF\_AUTHOR: w4z004

NEWS\_PDF\_DATE: 2002/7/10 15:27:00

If you need a professional banners system, you need to use Phpads.

Well, I have upgraded the phpadsnew banners system.  
You can see the files in the downloads section.

Have tons of little fixes and enhancements.

To upgrade (if you have installed it before) , only backup your old /modules/phpads directory, overwrite it with this package and replace config.ing.php with your old backedup config. Go to the admin, press the phpads logo and the upgrade is automatic.

Note: the phpads module has a super complete documentation, please download and read it!
