

aChat, a chat with AJAX - new version 0.2 - Modules

NEWS_PDF_AUTHOR: niluge_kiwi

NEWS_PDF_DATE: 2006/8/31 8:29:54

Hello all!

I publish the new version of the aChat module!

The functionalities are explained on the "README.txt" file.

A summary : Smilies, XoopsCodes, Colors for messages, choose of nickname for anonymous (all parametrable), purge, log files, view logs and archives, management of the rights to send messages ...

For the AJAX, I used a french Javascript Class : [XHRConnection](#).

[Download aChat v0.2](#)

[demo aChat v0.2 here!](#)

The archive contains french, english and spanish (thanks to **JAWi Tugal** !) languages.

If someone has improves on the english language files for my module, or has other translations, I'm interested! I'll put them [here](#).
