[The SmartFactory](#) is proud to announce the release of XOOPS Multilanguages 2.0.6, supporting XOOPS 2.0.15 ! Please note that XOOPS Multilanguages 2.0.6 **only works with XOOPS 2.0.15**. You can download the package here : [XOOPS Multilanguages 2.0.6 Final](#).

What's new ? In addition to support the latest XOOPS release this package has 2 interesting new things. First one is a certain optimisation in the code in order to decrease the number of core files hacked by this package. Second one will ease the life of many webmaster : the addition of a language select box on the admin side :

Installation Please carefully follow the instructions in the ReadMe.txt file as it contains **VERY important informations**. If you don't know what XOOPS Multilanguages is and you would like more info, have a look here : [Learn more about XOOPS Multilanguages](#). Support for this package is offered on [XOOPS Multilanguages Support Forum](#). As usual, any feedback is always welcomed !
