I can't tell you how thrilled I am with the progress of Xoops. I have been using Xoops for the past four years and have installed it on many websites.

I was slightly disappointed when I upgraded to 2.2 although there were many features that were great. When I downgraded to 2.0.13, I had to completely redo the site because the downgrade did not go well.

However, the upgrade is great! And the modules have so improved the functionality of my website and the ease of taking care of it. And after being down for nine months, the site has taken off like never before.

To all the Xoops developers, I can't thank you enough. You are helping to make the internet a better place for us.
