GameCredit Module - Modules

NEWS_PDF_AUTHOR: aim4fame

NEWS_PDF_DATE: 2006/9/13 22:00:35

This is a game credit module. It allows you to set and display awards for gamers high scores. This can be in the form of credits maybe into a table. Or maybe to reward real high scores with money.
An admin interface would really do this module some good. It should be available in the next release.

You can download Here

info:

1.Gets highscores that are saved in a mysql databse.
2.Displays the high scores.
3.allows you to set a date where winner will be automatically
announced, and credit will be given
