I released this first theme a few months ago for XOOPS 2.2, it is the GunMetal theme re-released for 2.0.14+.

You may remember it

This second theme is another theme based off of Montis's core. Like The Gunmetal theme I have recoded it to be Valid xhtml 1.0 transitional. This theme is based on the game Wolfenstein:Enemy-Territory

The third and final release is a theme based on the too-popular World of Warcraft MMORPG. It is yet another Montis Mod, and has also been validated.

You can download all of these themes at [Et-Main](#)

I hope you enjoy them, I will be releasing more as they are finished.
