

CVS Repository up - Developer News

NEWS_PDF_AUTHOR: Anonymous

NEWS_PDF_DATE: 2002/7/21 18:50:00

It's finally here! All of xoops has been tranfered to CVS.

You may grab the latest CVS files from anonymous CVS by using a program like [WinCVS](#) or [TortoiseCVS](#) (easy to use) and the following login information:

Server Type: pserver

User Name: anonymous

Password: n/a

Server: cvs.xoops.sourceforge.net

Path: /cvsroot/xoops

Or you may directly browse the CVS tree with your navigator by pointing your browser [here](#).

If you're the impatient kind who wishes to apply bugfixes before the whole world, just keep an eye on the changelog files which can be found here: [CHANGELOG](#). Hack at your own risk :o)

Cheers, n best wishes from the DEV Team!
