

Simple Weather Module Released - Modules

NEWS_PDF_AUTHOR: dpfresh

NEWS_PDF_DATE: 2006/9/27 10:30:38

A simple weather module with a weather block, module page and options to choose from multiple cities and Fahrenheit or Celsius. This module is English only at this point in time.

Features:

- XOOPS group permissions integration
- Weather Block
- Choose between Fahrenheit or Celsius
- Give users choice of several cities to view
- Several config settings in preferences

Download from [Xoops Dev site](#) or this site when it is available in the module repository. Support is at the [Simple Weather Module Dev](#). Developers Web Site: <http://www.picharddesign.com>
