BlackNGold Theme - Themes

NEWS_PDF_AUTHOR: JMorris

NEWS_PDF_DATE: 2006/10/16 3:24:24

If you like dark, beautifully simplistic designs, then you definately want to check out this theme! The original version of this theme was designed for a client, but the client didn't pay, so I decided to release this theme to the community. His loss is your gain!

This design stays true to my preference towards fixed-width, two-column, table-less designs that are SE-friendly and simple to modify. As usual, this design is standards compliant and is licensed under the GNU/GPL license. All I ask is that you retain the link to MyWebResource in the footer.

This design does vary a little bit from it's original form with regards to the graphics and some of the Smarty trickery that was originally employed. Nevertheless, I think you will find that this theme is a great choice for sites that call for a dark, brooding feel that is easy on the eye.
