

Cordemanon - Whitepaper downloads - Modules

NEWS_PDF_AUTHOR: Mithrandir

NEWS_PDF_DATE: 2006/11/9 11:19:11

A new module is now available from [Cusix Software](#):
Cordemanon - a module for downloading whitepapers.

Yet Another Download Module? You may ask, and yes, it is. But it is a bit different from most others.

- a) Downloads can be placed outside the web root
- b) To download, users must be logged in, downloads are registered intensively
- c) Downloads are grouped in customers, related to a XOOPS user, letting users manage their own whitepapers
- d) "People, who have downloaded this whitepaper also downloaded these" listing

The module is developed by [Cusix Software](#) on behalf of [Version2](#), a new Danish IT media.

[Download here](#)

[Demo here](#)

Installation instructions:

- 1) UPLOAD module package as normal
- 2) INSTALL the module as normal
- 3) CREATE a new folder - preferably outside your web root - on your website, chmod it so that the webserver can write to the folder
- 4) UPDATE the module's preferences with the physical path to the new folder from 3)
- 5) COPY the contents of cordemanon/bak.htaccess to an existing .htaccess file in the web root or CREATE a new .htaccess file in the web root with the contents of bak.htaccess, adding

RewriteEngine on

to the top of the file.

- 6) ADJUST the paths in the .htaccess file to match your settings, if you have XOOPS installed in a subdirectory to your site

For users to become customers, they must

- a) Be in a group set in module preferences
- b) Be connected to a customer
- c) Have access to the administration area and module administrator privileges of the Cordemanon module (they will not be able to manage anything but their own whitepapers)
