[Cusix Software](#) has just released [Cordemanon](#) - a module for managing and downloading whitepapers - in an updated version 1.01.

The module is fairly simple with categories, customers and whitepapers, but the registration of downloads is more extensive than most download modules, the grouping of downloads by customers allows customers to manage their own whitepapers and files can be placed outside the web root to disallow direct linking.

Cordemanon was developed for [Version2](#), a new Danish IT media, and modified slightly for public usage.

Version 1.01 has just a few changes:

- 1) Minor fixes in file path processing
- 2) Extended information about writeability of file path
