

Freeform Solutions is hiring a Web Developer - Developer News

NEWS_PDF_AUTHOR: jegelstaff

NEWS_PDF_DATE: 2006/12/15 9:30:00

Freeform Solutions is very excited to announce that we have a full time, six month position open for a XOOPS developer/webmaster! For two and a half years, we have been using XOOPS as the backbone of the website consulting part of our business in the not-for-profit sector, and the time has come to formally expand our ranks.

Details are available here: <http://www.freeformsolutions.ca/jobs>

We are not necessarily looking for an amazing programmer (though amazing programmers certainly are welcome!). What is essential is knowledge of PHP or at least some other web scripting language. The key thing we are looking for is a well rounded individual who is dedicated to this kind of work and who can work with clients to define their needs and make them a reality.

The successful candidate will spend a great deal of time working on XOOPS websites, and adding features to our [Formulize](#) toolset, and to the XOOPS core too where appropriate. All that development work will of course be released as open source contributions back to the community.

We are located in Toronto, but we are a virtual organization and so we will entertain applications from far and wide. However, Canadians and permanent residents of Canada will be given priority.

The deadline to apply is January 5, 2007. Application instructions are in the link above.

Thanks for reading, we look forward to hearing from you.
