GreenLeaf Theme - Themes

NEWS_PDF_AUTHOR: JMorris

NEWS_PDF_DATE: 2006/12/17 19:07:27

The GreenLeaf theme is a variable width, 1/2/3 column design that is highly flexible. The focus of this theme was to create a nice visually pleasing theme that satisfied the requirements of being variable width, 3 column compatible and XOOPS 2.0.16+ compatible.

As usual, this theme is XHTML 1.0 Transitional and CSS 1.0/2.0 compliant and is targeted towards users who're not afraid of doing a little fine-tuning to personalize their theme to their site. Also, for those who want to further personalize the graphics, all source images are included.

I hope you enjoy using this theme as much as I've enjoyed designing it. If you find any bugs, please let me know and I'll fix them as soon as I have the time.
