Theme Hot Xoops

Following a last article on Xoops France, I had indicated that I will publish some of my achievements.
Here thus the first availability of the community under Creative license Commons. This theme, valid XHTML 1.0 Transitional and CSS 1.0/2.0 compliant, is based on the theme template Mor.pho.GEN.e.sis 1.1.0., and was carried out in approximately 4 hours (it is true that I know it a little).
You can download it at this address and see it in action here.
