

Phppp module's festival or how to start new year with updated "must have" -  
Modules

NEWS\_PDF\_AUTHOR: Marco

NEWS\_PDF\_DATE: 2007/1/5 19:00:34

Did you notice that, recently, Phppp, a discrete guy, has released some new version of his modules.

Here they are :

[Tag 1.6](#)

[Xpress \(Wordpress for Xoops\) 2.05](#)

[Dokuwiki 2.02](#)

[Article 1.0 FC](#)

[CBB 3.08](#)

[Xoopseditor Package 1.10](#)

[Framework 1.10](#)

This package should often be installed with phppp's module. Please check the release version you use on your production environment, and upgrade if needed.

Those are some gifts we can start the new year with. Many thanks to Phppp for these releases.

Have fun 

marco
