

Dr. Allen Website - YAXS

NEWS\_PDF\_AUTHOR: rabideau

NEWS\_PDF\_DATE: 2007/1/10 2:45:35

I have just opened up a new XOOPS 2.0.16 website for a dentist's office. The site is available from either:

<http://dr-allen.com> or  
<http://rodneycastledds.com>

This site is a bit different for me. This site makes rather extensive use of Flash, something I haven't done with XOOPS before. It also has a flash entry portal page. As with all my most recent sites this site theme is fully wire frame and w3c compliant. The site also makes use of the css min-width command 🤪 (which works with most browsers except IE 6 and under, and MAC IE, I'm told).

**Please visit the site, sign our GuestMap** and let me know what you think.

Pax vobiscum,  
...mark

PS. I'm still working on a couple of pages... 🤪
