The "article" module is an advanced content management module for Xoops 2.0\*, 2.2\* and 2.30.

It is ideal for article or knowledge management, meanwhile it is capable to serve as a comprehensive news module or blog system simply by setting corresponding preferences. Some of the features:

multiple category, multiple page, flexible template, fine permission and workflow control, editor/user role separation, full-featured content presentation, customizable edit form, easy-to-clone, etc.

Download and technical support:
