[Parent-Solo.fr](#) is a collaborative and community news and services website dedicated to single-parent families and more widely to all people searching answers to a situation of familial break-up : only parents, separated parents with or without the custody of their children, grand-parents, new spouses, children.

**Parent Solo.fr : Answers to actual needs** A site that one-parent families were waiting for. Parent-Solo.fr created an exchange's place open to a plurality of actors, in the respect of the human values that drive us. Our ambition is to constantly innovate by favoring the visitor's creativity but also by developing partnerships that respond to our members needs. **A need-based approach:** Law and finances (maintenance allowances, new legislation, parental authority, inheritances...) Children and upbringing (joint custody, school difficulties...) Social life (recreating a relational network, meeting people living the same situation...) Health and Psychology (separation, the children of your new partner, spare time...) Holidays and leasures (going on vacation alone with a child, going out...) Employment and housing (settling in at low cost, finding a new housing...) **Kind of information you can find at Parent-Solo.fr :** Parent-Solo.fr structured the different types of news searched for, by using simple tools that have proven their efficiency on the web [A discussion board](#) [Thematic records](#) [Notes about current news](#) [A library](#) [An events calendar](#) [An Associations directory](#) [Small ads](#) [A juridical column](#) And many more ... Holidays, children custody, housing, transports, relationships... It's during day-to-day life that single-parent families preoccupations are specific and don't find appropriate responses. Today, we do know them: their waitings, their needs, their means, their profile. **Bienvenue sur Parent-Solo.fr !**

Parent Solo est le site collaboratif et communautaire, d'information et de services aux familles monoparentales et familles recomposées : mamans seules, mais aussi pères seuls, parents seuls, beaux-pères/pouvoirs conjugués ou nouveaux conjugués de parents solos.

Bien que les mamans solos soient plus nombreuses à vivre avec leurs enfants, elles restent essentiellement seules à gérer seules au quotidien, moins nombreuses à vivre avec leurs enfants, mais pas moins pleines pour leurs enfants, et aux parents "solitaires" qui vivent pas la solitude habituelle des enfants.

Bienvenue !
