Now Correct me if I am wrong, but I believe that this is the first XOOPS theme to implement alternative style sheet functions.

What does that mean?

Simple, This theme allows users to select from 3 colorschemes, and even stores there preference in a cookie.

Which means that when they come back to your site they wont have to switch to their favorite scheme.

This is my first attempt at incorporating this feature into my themes. In the future I will be utilizing this with more graphically rich concepts.

I hope you all enjoy this little toy.

Best yet, I do hope to see more uses of this function.

Enjoy!
