

AM Reviews module preview - Modules

NEWS_PDF_AUTHOR: AndyM

NEWS_PDF_DATE: 2007/1/24 22:50:19

I'm pleased to announce the second preview of *AM Reviews*, my review module for XOOPS2.

This module has been a long time in development, mainly due to other projects and life getting in the way, but finally I am actually getting close to a public beta release.

The preview or the module can be seen at <http://support.sirium.net/modules/amreviews/> and an example review [here](#)

Features:

- o sub categories
- o group permissions on categories
- o e-mail to friend
- o print version
- o pdf version
- o css based rate images
- o supports [lightbox](#) for highlight images (this can also be used for images in the review by adding a small bit of code to the image link).
- o Configurable page title for SEO
- o Configurable meta tags for SEO
- o Multiple pages

And more...

There's still things to do, like a user submit page, various blocks and notifications. A public beta release should be available within the next week or two.

Anyway, if this module interests you, I'd appreciate it if you could provide some feedback.
