

FREE!! WireFrame (Table Free), Opacity, Font resizer themes - Themes

NEWS\_PDF\_AUTHOR: rabideau

NEWS\_PDF\_DATE: 2007/1/31 21:44:50

Per my earlier promise... I have made two variants of my wireframe theme for your use, improvement, etc.

These themes may be seen in operation at: <http://eirenicon.org> (select the **try our themes** option to see both XOOPS and XOOPScan) So far as I know any current XOOPS module should work with these themes so long as the module works with 2.0.1x of XOOPS. They may work with the 2.2.x branch but I haven't tried or tested that. 😊 The themes also work in two or three column format (you choose the mix and match).

The downloads, along with usage instructions etc., are available in the Downloads area. I hope people find these helpful and useful. 😊

Remember no warranty is expressed or implied. 🙄 Any use is at your own risk. 😊 legal blah blah, blah, blah The themes are licensed under Creative Commons Share-alike 2.5

Happy XOOPSing!

Pax vobiscum,
