Hi again, I thought I would mentioned that recently I opened another XOOPS powered site, [Fans Of Big Brother \(F.O.B.B.\)](#). When I moved and redesigned my Big Brother fansite, I decided to change it to a XOOPS powered site this time around, because it's more user friendly, has much more flexibility and well, coz I love using XOOPS :) It's running XOOPS 2.0.16 at the moment. I decided to start from scratch as far as memberships go for the site, and transferred most of the content over and designed a new Theme for it and modified a couple of my own Themes for it. I will be releasing a Big Brother Theme similar to the one on the F.O.B.B site sometime in near future, so keep an eye out for that :) When I release it, it will be available from my main site <http://www.richardsdomain.com> Some content is still being added, so Big Brother fans can search for information regarding Australian BB. I have used SmartFAQ, XOOPS Content for a Quiz area for members, NewBB for the Forums, and some of the main XOOPS modules that most sites use. Feel free to take a look around and let me know what you think of the site and Theme, if you're a Big Brother Fan, feel free to register :)
