

UserPage version 1.21 - Modules

NEWS_PDF_AUTHOR: hervet

NEWS_PDF_DATE: 2007/2/7 9:56:09

[Instant Zero](#) is happy to release a new version of our web 2 Xoops module, [UserPage](#).

[This new version](#), still compatible with Php 4 & 5 and Mysql 4 & 5, brings some bugs corrections in the module's administration and in the xoops_version.php file.

You can now use some new Smarty variables in the module's index page :
user_avatar, user_name, user_uname, user_email, user_url, user_from, user_sig

This version should runs with Xoops 2.0.x and Xoops 2.2.
We have also tested it with the latest RC of Xoops Cube.

[Use this forum to get help](#)

[And you can use this page to download the module](#)

To update the module, copy all the files to your webserver and update the module in the Xoops modules manager.

Note : there were no changes in the translations

Happy Xoopsing !
