

Google Search - Modules

NEWS_PDF_AUTHOR: LiliVG

NEWS_PDF_DATE: 2007/2/22 15:39:51

This module puts Google Search directly into your XOOPS website. Users can search either your site, or the web. You get super-fast detailed search results with no queries to your database, and your visitors never have to leave your site. This module also has one search block.

A nice feature of this module is how simple it is. Just install it, and it's ready to go.

Note: Your site **MUST** have been indexed by Google in order for this module to retrieve your site-specific results.

It is known to be stable on Xoops version 2.0.16, and hasn't been tested on any other versions. But since it's a very simple module, I would say it's probably fine on several recent versions as well.

It is running live [Here](#)

and

It can be downloaded [Here](#)

If you have any questions or comments you can post them in the [XOOPS forum](#) at Sundrania.com.

Enjoy! :)
