Mr. Theme.com is proud to announce "hazard_full".

Due to an overwhelming amount of requests, we have decided to take the hazard theme and make it variable width.

This means "fullscreen"

Preview:

The only reason this theme was fixed width in the first place was because of the header. What we have done here is added a mesh background that expands as the theme does.

Example:

The entire header can of course be replaced very easily.

As always we are eager to hear your comments and suggestions.

Demo and Download only available from [Mr. Theme Designs](#).
