Clientspace 2.0 Alpha is out - Modules

NEWS_PDF_AUTHOR: smart2

NEWS_PDF_DATE: 2007/2/27 5:58:09

Hi all, first alpha version of clientspace 2.0 is out.
Available here : http://www.s-martinez.com/modules/wfdownloads/singlefile.php?cid=2&lid=3

Be careful you have to fully uninstall older versions before you can install this release which has been totally recoded (all docs will be lots).

Now the module is much more customisable to fit your needs.
You can now activate or not follows up and create categories to store documents.The storage of files isn't BLOB based anymore and files are now stored in the file system and protected by .htaccess.

Thanks for your feed back, there are probably some errors to correct as it is only an alpha version which is going to be improved.

Cheers
