

XoopsCare version 1 & Marquee version 2.42 - Modules

NEWS_PDF_AUTHOR: hervet

NEWS_PDF_DATE: 2007/2/28 10:27:24

[Instant Zero](#), your specialist in Xoops modules development, is happy to announce you the release of our definitive version of our new module [XoopsCare](#) and a new release of our Xoops module, [Marquee](#).

Both modules brings some bugs corrections and can be obtained here :

[XoopsCare 1.0](#)

[Marquee 2.42](#)

To update the modules, you just have to copy the modules content to your website then to upgrade them in the Xoops modules manager.

There were no changes in the translations

To have help, please go to the :

[XoopsCare Forum](#)

[Marquee Forum](#)

Here is the changelog :

- XoopsCare

Bug correction, the exit instruction was missing in the log files (sometimes)

The module is available in Arabic, English, French, Italian, Persian, Brazilian, Romanian and Spanish

(Thank you very much to the translators)

- Marquee

- I have replace the Php glob() which was causing some troubles on some hosts

- I have corrected a bug in the administration's menu (bad link)

The next releases of XoopsCare will bring some new functionalities for the spam and for your site management.

Best regards,

Instant Zero
