

AM Contact v0.04 released - Modules

NEWS\_PDF\_AUTHOR: AndyM

NEWS\_PDF\_DATE: 2007/3/5 8:47:25

This is the first public beta release of AM Contact, a simple "contact us" module. I basically threw this module together as I've been getting increasing amounts of spam sent through other contact modules I've used.

As a result, this module has image captcha verification (this will need a little bit of tweaking for future releases as sometimes it's too hard to read), or you can use the Question & Answer verification instead - this presents the user with a simple, random question from a list that you can define in the admin area.

Hopefully, the verification should help cut down on spam submitted by bots.

AM Contact can be downloaded from [here](#).
