

XmSpotlight module for Xoops News 1.5 (Hacked version) - Modules

NEWS_PDF_AUTHOR: ecolips

NEWS_PDF_DATE: 2007/3/19 2:00:00

Xm-Spotlight module which is used to spotlight News in main page doesn't work with News 1.5 or higher versions. It only works with News 1.4 . I have modified some php codes as told in the Xoops.org forums and packed it again. Now it works with News 1.5 with no problem. The module based on Xm-Spotlight 1.02beta2 by SMD.

There are two versions of the package. First one with the original template file and the second one with the modified template file wich I am using at ertx.comRock portal site.

You can download the files from [my sites Xoops section](#).

Moderator Note:

Please note: The original version of this module, by smd, is under development in conjunction with Bandit-x - and can be found at <http://www.xoopsmalaysia.org> or <http://www.bandit-x.net/projects/xm-spotlight.php>
