

5 news themes Kris Productions - Themes

NEWS\_PDF\_AUTHOR: kris\_fr

NEWS\_PDF\_DATE: 2007/4/2 21:53:53

XooFoo.org proposes 5 new topics to you based on the theme template [Mor.pho.GEN.e.sis 1.1.2](#).

These themes all are valid XHTML 1.0 Transitional and CS 1.0/2.0 without the least warning, they are carried out starting from various templates existing in free remote loading. They are placed at the disposal of the community under the [licence Creative Commons](#).

You can download them at this [adress](#), and visualize them in action [here](#) or on [there](#).

**Kris 124**

**Kris 125 - Simple Orange**

**Kris 126 - Simple Blue**

**Kris 127 - Simple Green**

**Kris 128 - Grassy**

Concerning the theme "Grassy", this one is the final result of the tutorial making it possible to learn how to carry out a theme for Xoops starting from a template HTML which we can find on the Web.

A video first (in french audio only, sorry) of this tutorial is visible on [Tutos XooFoo.org](https://Tutos.XooFoo.org). The Zip file containing the files to follow the tutorial is downloadable on this [link](#). For any creation of topics, modifications or explanations, you can make a request (french or english) on the forum of [Labs.XooFoo](#) or [Xoops France](#), after you are recorded there.

To decipher the code of multiple files HTML and CSS of the template Mor.Pho.GEN.e.sis, you have a [wiki](#) which follows the versions of this reference of the architecture of a theme for Xoops. Why I work starting from Morphogenesis? because this theme template was downloaded more than 2.000 items, and becomes the reference for the creation of theme for xoops, and I do not see why reinvent the wheel.

It is simple to adapt and associate the 'surcharge" themes, respects the standards of the W3 C, and offers very great possibilities of creation for a designer.
