

WF-Sections V2.92 Released (PHP5 Update) - Modules

NEWS\_PDF\_AUTHOR: Catzwolf

NEWS\_PDF\_DATE: 2007/4/10 0:30:00

This is a bug fix version of WF-Sections. Well actually this version will allow you to run WF-Sections on php5 now without any issues.

I also fixed a few other minor issues. Whether or not I do any major work is a different story.

You can download it from [here](#).

I will release a v1 to v2 script within the next few days.

Note:

WF-Sections is considered 'OLD' now and I am ashamed to say the coding standard in this module is well below what it should be (We all have to learn somewhere) and there are better coded modules than this out there for this job. So use at your own risk :-p
