

Picito 1.0 / 1.1 released - Modules

NEWS\_PDF\_AUTHOR: Sophie2

NEWS\_PDF\_DATE: 2007/4/20 19:30:00

Picito is a very simple Xoops module for uploading pictures and creating thumbnails (like imageshack for example). Please note that this module was written just to check how Xoops works but I guess it's better to release it than delete it.

It takes a picture, uploads it, creates thumbnail and two fields (bbcode and html code) for posting this picture to forums or websites.

You can see a screenshot [HERE!](#)

Download this module [HERE!](#)

Any comments are welcome. 😊

[Update]: Picito 1.1 was released. (See comments below)
