

Picito 1.0 / 1.1 released - Modules

NEWS_PDF_AUTHOR: Sophie2

NEWS PDF DATE: 2007/4/20 19:30:00

Picito is a very simple Xoops module for uploading pictures and creating thumbnails (like imageshack for example). Please note that this module was written just to check how Xoops works but I guess it's better to release it than delete it.

It takes a picture, uploads it, creates thumbnail and two fields (bbcode and html code) for posting this picture to forums or websites.

You can see a screenshot **HERE!**

Download this module **HERE!**

Any comments are welcome. (4)

[Update]: Picito 1.1 was released. (See comments below)
