

BurnOutPC Revamped, - YAXS

NEWS_PDF_AUTHOR: modkid

NEWS_PDF_DATE: 2007/5/3 0:30:00

BurnOutPC.com recently switched to another design and newer version of Xoops.

BoPC used older versions of xoops in the past, we've been running Xoops for the last couple of years.

We were looking for a new design half a year ago and with a post on the Xoops forum, I came in touch with [Nuno Luciano](#) who after months of work in his spare time, developed the new look for BurnOutPC.

Currently BoPC runs on Xoops 2.0.16 with Smartsection as major feature of the site. Along with some other modules like Smartpartner and TinyD for static content.
