

Acida Software Chooses for Xoops - YAXS

NEWS_PDF_AUTHOR: VTRIX

NEWS_PDF_DATE: 2007/5/30 13:56:41

A long time ago, another person posted a message about the Acida Software website, the old webmaster.

Since a month or something, I took over the Acida Software website, and I changed almost everything on the site so it could be used properly.

I setted up a new Xoops installation, and i'm using the theme vblue, the modules Mastop Publish, Liaise, MyDownloads and the News module.

The site is dutch and can be found on <http://www.acida-software.com>

We currently create only FREE software with NO spyware OR adware OR other unwanted additions.

You can download our currently most active project, DayDawn, on this page [Click here for the download instructions](#)

Greetings,

Kevin

PS: sorry for that old message of the other webmaster of Acida Software
