

PK Theme - Themes

NEWS_PDF_AUTHOR: aph3x

NEWS_PDF_DATE: 2007/5/30 13:57:28

PK theme originally was made with just 2 columns but as the width is not fixed, the 3rd column can easily be added (a 3 columns version will be added later today). It was made taking in consideration the 2 existing XOOPS branches and it can be used for any XOOPS version without the need of editing the theme document.

Package contains and a read me file that I **SUGGEST** you read because there is a **small** modification required for the theme to work well

Theme can be viewed in action [HERE](#)
installed there as **theme1**

Theme can be downloaded [HERE](#) or [HERE](#)
Enjoy it
