

Easyhosting to consider withdrawal of support for Xoops - Security

NEWS\_PDF\_AUTHOR: chippyash

NEWS\_PDF\_DATE: 2007/6/3 23:39:42

Following a hack on one of our websites, the site hosters have claimed that the hack occurred because of insecurity in the Xoops systems.

To quote Easyhosting

Quote:

I think it very likely that we would not host xoops any longer on any of our servers.

Now you have to take this with a little pinch of salt as the only hacks that have experienced by us have been on Easyhosting's servers. (Other sites are run on a different hosters.) Easyhosting have been asked to provide details (in detail) of the security breaches and the response is awaited. We might be waiting a long time.

In the meantime [valentinewalton.co.uk](http://valentinewalton.co.uk) and [bbcb.co.uk](http://bbcb.co.uk) (not effected yet but on the same hosters) need a fast and free home for 3-6 months while this stuff gets sorted.
