

My_eGallery updated for XOOPS 3.04 Beta 1 - Modules

NEWS_PDF_AUTHOR: Boobtoob

NEWS_PDF_DATE: 2002/8/13 5:35:47

Ok, I've done a lot more hacking on this nice gallery module so that it should install out of the box with XOOPS. Please read the docs/install.txt and readme.txt before activating this module.

Download it [here](#).

Updates Include:

- updated the module code to use xoops db api's
- made the module xoops 3.04 install friendly
- created a control panel menu for easy navigation
- updated the blocks to be xoops 3.04 friendly

Kick the tires and post any bugs you find in the forums. I'll try to help as much as possible but just like any module, this will probably have some bugs. If I can reproduce a problem your describing, I can probably fix it.

Eric
