Hey All,

Yours Truly will be representing Xoops at the upcoming Open Source Content Management Conference in Berkly http://www.oscom.org , I willl be doing a 45 minute presentation on Xoops, along with Gregor from PN.

I would like to get some sites that I can showcase for the presentation, and some case studies on how you all are using Xoops in an "Interop" environment.

I would also like to show some sites that are used in an Corporate Intranet Environment, used for News Based Sites, and just a regular Eccommerce based site.

If you have any suggestions, or case studies you can email me that would be great. Please send an email to me at .malexandria@eclipsemagazine.com

Thanks
