

[hotxpot.com](http://hotxpot.com) - Meet Up - YAXS

NEWS\_PDF\_AUTHOR: attock

NEWS\_PDF\_DATE: 2007/6/22 9:18:42

A site dedicated to music lovers, based on xoops 2.16 and phpizabi design (modified). Some of the main features are:

### **Advance Profile System**

Now you can have orkut\facebook\myspace kind of profile in xoops. With hotXpot profiles, you can:

**Customize** the looks of your personal page

**Submit** a detailed personal profile, based on your interest, contact info, personal and general info.

**Networking** Add friends, or write them comments (based on xoops myfriend module)

**Privacy** options such as who is allowed to view your profile, pictures frnds etc.

**Advance Notification** e.g. notify when a frnd writes you a comment.

### **Music Module**

hotXpot has one of the advance music module within the entire xoops community. The module is based on debaser, heavily modified to meet up with the needs of a typical music lovers. Some of the features include:

**No Need To Host** song, you can simply submit a link to the song thats already available on other websites.

**Music Albums** can be created and edited very easily.

**YouTube Videos** are displayed with the songs.

**Download** music for free!!

**Meet Up** with people of similar taste via recent listeners box

**Play Online**, no problem.

**Like the song?** go ahead add it in your personal album.

**AdoVdo** (beta) for all your music needs.

The rest is typical, a news module, a forum, a gallery and some users
