

HiTech Theme - Themes

NEWS\_PDF\_AUTHOR: JMorris

NEWS\_PDF\_DATE: 2007/6/24 3:13:29

**Target Audience:** Mid-Level XOOPS Users

**Required Version:** XOOPS 2.0.x

**Description:** The HiTech theme was the original theme of [MyPCResource](#). It's been nearly a year since I did any serious work on that site, so I've decided to release that site's original theme to the public.

Users who are familiar with basic module configuration and who understand basic HTML shouldn't have any problems adapting this design to suit their needs.

As with all fixed-width themes, there are some module compatibility issues. Be sure you test this design thoroughly and configure your module templates properly before transitioning to this design.

This design has been tested in Firefox 2.x, IE 6.x and IE 7.x. This design passes W3C XHTML 1.0 Transitional and CSS level 2.0 validation.

Enjoy!
