This summer, I have a site under xoops to report my holidays...

To carry out that, the XooFoo.org Laboratory prepared you a version Xoops 2.0.16 "[Portable](#)" functioning on an USB key with the miniservor [Movamp](#) and Firefox browser.

This preinstalled version is made up of the main modules (in French and English version) : edito, news, smartsection, cbb/newbb, myalbum, mylinks, wfdownloads, smartpartner, contact, sitemap, myiframe, tinyeditor, multimenu, backup, blockadmin, xoopsinfo, xoopscare, protector and xplorer. With this package, you will have all the elements necessary to build your website some is the place of your stay.

You wish to make discover Xoops with your friends? Do not hesitate to duplicate your USB key!

You can download this executable package (for Windows only) at this [address](#).

Installation process (video of presentation on this [link](#)) :

1. Decompress the folders and file on your key usb while launching the executable "serveur\_movamp\_xoops\_2016en.exe"
2. To go in the file "serveur\_movamp\_xoops\_2016en" and to launch "start.bat"
3. To authorise the execution of movamp or/and firefox in the windows of your firewall (if necessary)
4. You here on your site, there are two members of create : one with rights of administration (pseudo: admin, pass: admin) and a second with rights of recorded member (pseudo: user, pass: user)
5. To carry out your website!! while also serving to you as the help files or readme

contained in the modules.

In spite of the possibility of publishing and of amending the files using the [Xplorer module](#), I recommend to you all the same to add [certain soft](#) in “portable” version, for example: [Maxthon](#) or [Firefox](#) or [Opera](#) as navigator Internet, PsPad Editor or NotePad ++ as editor of file, [FastStone Image Viewer](#) for the images, and 7Zip for the compression (or decompression) of files.

You here now fine loan to spend an excellent summer under the Xoopsien sun, without capture of head!!

The support of this package is ensured on the forum of the [Laboratory XooFoo.org](#) and on that of the French Community [Xoops France](#).
